IT Staffing Services, Focus & Expertise

For 45 years and counting, Indecon Solutions has provided premier IT staffing services to its expanding client base. Restricting our focus to IT skills had paid off in dividends for clients, whose technology teams excel with Indecon's strategic infusion of new resources, expertise and support.

We are also a proud people company—determined to help our valued, talented IT consultants find the right places to apply their skills and make a difference. Indecon's dual commitment to client and consultant satisfaction is a cornerstone of our success, resulting in a deep network of qualified, loyal and talented IT professionals.

IT Staffing Services

Indecon Solutions provides businesses with highly qualified, rigorously vetted technology professionals and teams for any of the following staffing needs:

- Contract-Based IT Staffing
- Contract-to-Hire IT Staffing
- SOW (Statement of Work) Staffing
- IT Permanent Placement Services

We recruit the full gamut of IT skill sets, including project management, business analysis, application development, Web development, network architecture, quality assurance, testing and help desk/tech support.

*"I'm loyal to Indecon because they always provide the **highest level of service**, the talent is always exactly what we asked for and **they save us money.**"*

– IT Sourcing Manager
Major Midwest healthcare organization

A Triple Threat Expertise Advantage

At Indecon, we know staffing but we also know your business and we know IT. Many of our top leaders, recruiters and account managers come directly from the technology sector, bringing their experience and business knowledge to Indecon. In addition, we have built practices dedicated to serving the IT staffing needs of six industry sectors—health care, insurance, financial services, government, retail, utilities and telecom.

Together our three competencies—staffing, technology and vertical market expertise—offer businesses a knowledge advantage that ensures you get the right professionals, the right support and a job well done.

Hire Better, Save Time, Cut Costs, Innovate More

With an expansive network of information technologists, Indecon can deploy the right talent swiftly and cost effectively. We excel at rapidly mobilizing teams and/or individuals strategically aimed at our clients' most critical technology projects. As a result, our clients are able to work smarter and faster, launch their projects earlier and increase their contributions to business efficiency and ingenuity.

Relationships Come First

At Indecon our relationships come first. With our clients and with our consultants, we go above and beyond to build long-term partnerships that ensure we understand and support our clients' business objectives.

Best Practices & Proven Solutions

From our industry-leading candidate vetting process to rigorous account management systems, Indecon has developed world-class processes for meeting our clients' IT staffing needs. Through our experience, love for technology and commitment to the people we serve, we continue to improve our processes, ensuring that you are always benefiting from one-of-a-kind IT staffing excellence.
